

Stay alert and protect your company against fraud!

Scammers are posing as Republic Bank's Fraud Department and contacting clients in an attempt to gain access to their accounts. **They may be using Caller ID Spoofing to give the appearance of calling from Republic Bank (from 888-584-3600 or one of another of our legitimate phone numbers).** If you receive a phone call alerting you about a suspicious transaction on your business account, hang up and contact us immediately to report the issue.

Always remember: Republic Bank will NEVER contact you and ask you for your Secure Access Code, login ID, or any other Business Online Banking login credentials.

Below are a few additional tips to help prevent fraud on your business account:

Be cautious of phishing emails and texts.

- Fraudsters will attempt account takeovers by contacting you from seemingly trustworthy profiles
- Instead of clicking on a suspicious link in an email or text message, always confirm requests with a phone call to your trusted contacts

Avoid mail theft.

- Limit the use of postal collection boxes as they have become highly targeted in recent months
- Use the Business Bill Pay feature to have checks sent safely and securely

Keep your account under your control.

- Consider using Positive Pay[†] to safeguard your account against fraudulent check payments and ACH debit attempts
